TO WHOM IT MAY CONCERN:

Polycyclic Aromatic Hydrocarbons (PAHs) of the types listed below are not intentionally added during production to Makrolon[®] polycarbonate sheet products, and would not be expected to be present in the materials as shipped, with the exception of technically unavoidable traces.

Acenaphthene	Chrysene
Acenaphthylene	Dibenzo (a,b) anthracene
Anthracene	Fluoranthene
Benzo (a) anthraceno	Fluorene
Benzo (a) pyrene	Naphthalene
Benzo (b) fluoranthene	Phenanthrene
Benzo (ghi) perylene	Pyrene
Benzo (k) fluoranthene	

Analytical test results for typical Makrolon[®] polycarbonate resin grades indicate:

Benzo (a) pyrene <1 ppm
Total PAHs <10 ppm

We hope you will find this information useful. If we may be of any further assistance, please feel free to contact us.

Thank you for your interest in our products.

Sincerely,

Christine Bathgate
Senior Product Safety Representative
