Pursuant to Administrative Code Section 27-131, the following equipment or material has been found acceptable for use in accordance with the Report of the Material and Equipment Acceptance (MEA) Division.

Rudolph J. Rinaldi, R.A., Commissioner

MEA 456-91-M

Report of Material and Equipment Acceptance Division

Manufacturer - Sheffield Plastics, Inc., Salisbury Road, Sheffield, MA 01257.

Product - Slow burning plastic glazing material for windows.

Pertinent Code Sections - 27-330, 27-338(d).

Prescribed Test - RS 5-12 (ASTM D635).

Laboratory - United States Testing Company, Inc.

Test Report - No.103126R, dated January 21, 1992 and No.103837, dated March 27, 1992.

Description - Polycarbonate sheet material for used as slow burning plastic glazing material where allowed by the Code. Hyzod GP is a clear polycarbonate sheet material in thicknesses of 0.125, 0.187 and 0.250 inches. HYZOD AR is a scratch resistant polycarbonate sheet material available in the same thicknesses. HYZOD SR is a ultraviolet ray resistant polycarbonate sheet also available in the aforementioned thicknesses. All materials are classified as self-extinguishing in accordance with the above prescribed test procedures.

Recommendation - That the above described rigid plastic glazing material, classified as self-extinguishing by prescribed test procedures, be accepted as complying with Code requirements for slow burning plastic for use only as window glazing in unprotected openings. All shipments and deliveries of such material shall be provided with a certificate or label certifying that the material shipped or delivered is equivalent to that tested and acceptable for use, as provided for in Section 27-131 of the Building Code.
