

January 2012

Dear Valued Customer and UL Representative:

Please be advised that several Makrolon products found under Sheffield Plastics' File# E71069 are undergoing a grade designation change. This time of transition will be in effect until March 1, 2012.

Makrolon GP is changing to Makrolon GP-V
Makrolon SL is changing to Makrolon SL-V
Makrolon OP is changing to Makrolon OP-V
Makrolon AR is changing to Makrolon AR-V

During this time of transition, all of the above products manufactured by and purchased from Bayer MaterialScience LLC, Sheffield, MA prior to March 1, 2012 are considered equivalent and conform with all "-V" grade listed ratings of both UL files E71069 and E351891.

On or after March 1, 2012, any sheet product manufactured or sold by Bayer MaterialScience LLC will assume the ratings outlined in File# E351891. At that time, the grade designations of GP, SL, AR, and OP will assume the new ratings defined in this file.

Please feel free to contact your Bayer MaterialScience LLC sheet representative or Technical Services with any questions regarding this change.
