DESIGN AND MATERIAL SELECTION GUIDELINES FOR MOST RECENT HIGH PERFORMANCE THERMOPLASTIC SHEET MATERIALS NOW ON NEW WEBSITE

Sheffield, Massachusetts, May 15, 2009 -- A new website from Sheffield Plastics **www.sheffieldplastics.com** provides easy access to comprehensive information for selecting and designing with high performance thermoplastic sheet materials, including three recently introduced products.

Launched on May 4, the site offers engineers and designers helpful information on the company's standard and new performance-enhanced MAKROLON® polycarbonate sheet products for architectural and security glazing, signage, industrial equipment protection; VIVAK® sheet for point of purchase displays; and Bayblend® sheet for interior rail transportation.

Features include the ability to access information by specific industry. The data bases cover design tips, case studies, installation guidelines, FAQ's, and a complete battery of product performance comparisons, all available for downloading. Site users will also find details on product compliance with specific industries' regulatory bodies including FDA, UL, and Federal rail and aircraft agencies.

In addition to technical and application data, the new website also provides product sizes, textures, coatings and colors, and a list of Sheffield's North American network of stocking distributors.

For more information about Sheffield Plastics polycarbonate sheets call 1-800-628-5084, e-mail info@sheffieldplastics.com or visit www.sheffieldplastics.com <<http://www.sheffieldplastics.com>>.

About Bayer MaterialScience LLC

Bayer MaterialScience LLC is one of the leading producers of polymers and high-performance plastics in North America and is part of the global Bayer MaterialScience business with nearly 15,100 employees at 30 sites around the world and 2008 sales of 9.7 billion Euros. Business activities are focused on the manufacture of high-tech polymer materials and the development of innovative solutions for products used in many areas of daily life. The main segments served are the automotive, electrical and electronics, construction, medical, and sports and leisure industries.

Bayer Corporation, headquartered in Pittsburgh, is a subsidiary of Bayer AG, an international health care, nutrition and high-tech materials group based in Leverkusen, Germany. In North America, Bayer had 2008 net sales of approximately 8 billion Euros (about \$12 billion) and employed 17,000 at year end. Bayer's three subgroups, Bayer HealthCare, Bayer CropScience and Bayer MaterialScience, improve people's lives through a broad range of essential products that help diagnose, prevent and treat diseases; protect crops and enhance yields; and advance automobile safety and durability. For more information, go to www.bayerus.com.

This news release contains forward-looking statements based on current assumptions and forecasts made by Bayer Group management. Various known and unknown risks, uncertainties and other factors could lead to material differences between the actual future results, financial situation, development or performance of the company and the estimates given here. These factors include those discussed in our annual and interim reports filed with the Frankfurt Stock Exchange. The company assumes no liability whatsoever to update these forward-looking statements or to conform them to future events or developments.
